K-12 Mathematical Actions and Processes (MAP)
As stated in the Oklahoma Academic Standards for Mathematics, "The Mathematical Actions and Processes simultaneously reflect the holistic nature of mathematics as a discipline in which patterns and relationships among quantities, numbers, and space are studied (National Academies of Sciences, 2014) and as a form of literacy such that all students are supported in accessing and understanding mathematics for life, for the workplace, for the scientific and technical community, and as a part of cultural heritage (NCTM, 2000)." Each applicable Mathematical Actions and Processes standard are listed below the correlation with the corresponding code, MAP 1-7.

Mathematical Actions and Processes 1: Develop a deep and flexible conceptual understanding.
Mathematical Actions and Processes 2: Develop accurate and appropriate procedural fluency.
Mathematical Actions and Processes 3: Develop strategies for problem solving.
Mathematical Actions and Processes 4: Develop mathematical reasoning.
Mathematical Actions and Processes 5: Develop a productive mathematical disposition.
Mathematical Actions and Processes 6: Develop the ability to make conjectures, model and generalize.
Mathematical Actions and Processes 7: Develop the ability to communicate mathematically.
